

GIC Boergoat

Healthy and excellent growth

Healthy

Optimal carcass value

Excellent exterior

Good character

The sustainable solution for your herd

At Goat Improvement Company we work together with some of the world's best Boergoat breeders. Our line-up of GIC Boergoat genetics is a selection based on the breeding programs and breeding decisions of the individual Boergoat breeders that Goat Improvement Company works with. We support 2 concepts for the use of GIC Boergoat genetics, namely "Meat on Dairy" and "Show".

Get healthy, fast-growing kids with optimal carcass value with the Meat on Dairy concept, where you use GIC Boergoat genetics on your lower-ranking dairy goats for the highest return of investment.

Do you have optimum performance in the show ring in mind? Then choose the concept "Show" and get animals with excellent conformation and a good character.

Besides the traditional color, GIC Boergoats can also have other colors.

But above all, GIC Boergoats are the kind of trouble-free goats you love being around.

Healthy, fast-growing goats

Healthy

Excellent health and longevity

Optimal carcass value

High growth rates and optimal meat quality

Excellent exterior

Robust and show winning potential

Good character

Friendly and easy to work with

Meat on dairy - profit from every goat

Use GIC Boergoat genetics on your lower-ranking dairy goats for the **highest return on investment**. Breed **healthy, fast-growing kids with optimal carcass value**.

GIC Boergoats are an excellent choice for the meat-on-dairy segment, where easy kiddings, robustness, vitality and high growth has the highest priority.

Our sires give higher profitability to dairy herds delivering kids that combine efficient growth with optimal carcass quality, under all conditions.

GIC Boergoat sires provide...

- Easy kiddings - For a favorable birth process when used on dairy goats
- High production - Increased daily gain and superior carcass value
- Healthy kids - Robust and vital kids with high survivability

Show - the stage is yours

Use GIC Boergoat genetics in your pure-bred Boergoat breeding program for breeding optimal breed characteristics. Breed goats with **excellent conformation** and a **good character**.

GIC Boergoats are an excellent choice for the show animal segment, where excellent conformation, high growth and easy to manage animals has the highest priority.

Our sires give optimal show results to pure-bred Boergoat herds improving breed characteristics, growth rates, longevity and above all, easy to work with.

GIC Boergoat sires provide...

- Excellent conformation - Longevity and show winning potential
- High production - Increased daily gain and superior growth
- Easy to manage - Friendly and social

Bentley Bros Farms "One of GIC genetic sources"

Bentley Bros Farms located in Kentucky USA, is a family-operated farm dedicated to raising the best Red Boer goats.

Imagine what
GIC Boergoat could
do for your herd,
your business,
your life ...

Innovative breeding

Our passion at Goat Improvement Company is to help you as a farmer achieve your **economic goals, farm in a sustainable way and enjoy life**. We do this by breeding healthy, efficient and problem-free goats.

GIC is co-owned by Vikingdanmark, the cooperative of Danish dairy farmers. Together with similar cooperatives in Sweden (Växa) and Finland (Faba), they own Vikinggenetics.

We are a responsible and dedicated team that works every day to find solutions, through genetics, to challenges that you will experience on your farm. We help farmers create a sustainable food production for our planet.
